Summary:

I completed postgraduate studies at WSB Gdynia in the field of web application developer - "junior front-end developer" in 2020 and "software tester" in 2018 - during which I passed the ISTQB Foundation lvl exam. I like to gain new knowledge and I am interested in development towards a front-end developer also with a backend part for a full stack developer. Currently, I am developing in website design in various technologies. I create projects in HTML, CSS and JS and additional technologies such as the Bootstrap framework. I am also developing in the java-scripto Vue.js framework with its shell (vuelidate, vuex, v-tools). I also finished a few udemy courses on Vue.js and Node.js with Express.js and relational database MongoDB. In my projects I also use the FIREBASE non-relational database with FIRESTORE.

Abilities:

- JavaSript
- HTML5, CSS3
- VSCode
- Knowledge of Jira
- Windows, Linux/Ubuntu
- Scrum
- Bootstrap version 4
- Git/GitHub
- Vue.js
- Node.js - Basics
- SCSS – Basics
- Epress.js - Basics
